

Group 7

We chose Extreme Programming because of the following aspects:

- Pair programming
- Fast
- Focus on working program, not on documentation

As SCM we are working with Git/GitHub.

We use eclipse or NetBeans for programming in Java, because this is our programming language strength.

Our project schedule is as required by our exercise (see Gantt Chart in moodle).

Estimation: The program is small so we don't expect a long time to program.
